ACKNOWLEDGEMENT

First and foremost, I would like to express my sincere and deepest gratitude to my computer science teacher, Mrs. Juhi Sayyed Ma'am, whose valuable guidance assisted me in successfully completing this project.

I would also like to thank our esteemed principal Mr. Neeraj Bhargava Sir for providing us with the infrastructure and the golden opportunity to undertake this project which has educated and enlightened me about. Finally, I would like to thank my peers who have constantly supported me to complete this project.

AIM

This project shows the working of a website for an online bookshop. The aim of this project is for the admin to retrieve data, add records, remove and update the existing records and also to view the customers to view their records and purchase and view books according to their preferences.

With the access given to the admins, they can also have knowledge about the customers and the staff members.

SOFTWARE AND HARDWARE SPECIFICATIONS

- ❖ Hardware- Intel Core i7
- ❖ Software- Windows 10
- ❖ Backend- MYSQL
- ❖ Python- Thonny 3.10.6, Tkinter

BRIEF EXPLANATION

This project helps customers view and buy books according to their interests. They are shown summaries, reviews and ratings of the book to help them narrow down their choices. Customers can also add a review to a book after they have finished reading it so as to leave an opinion and help other customers, they are also directed to a unicef website upon providing their reviews, in order to spread awareness , we can also buy books based on ratings of the book and we can also see the preview of the books based on their page number and update , delete , and add records to customer , staff , review, buy, books tables respectively.

MODULES AND FUNCTIONS USED

BUY table

createtables()	For creating BUY table
addrecs()	For adding records to BUY table
buy1()	To buy a requested book
mainsell()	To display main menu of BUY table

CUSTOMER table

createtable()	For creating CUSTOMER table
addrec1()	For adding records to CUSTOMER table
fetchdata()	To display customer records
deletebyrno1()	To delete a customer record
menucustomer()	To display main menu of CUSTOMER table

STAFF table

addrec2()	For adding records to STAFF table
fetchdata1()	To display records
deletebyrno()	To delete a record
updatestaffid()	To update a requested staff record
menustaff()	To display main menu of STAFF table

BOOK table

addrec()	For adding records to BOOK table
display()	To display records
searchbyrefno()	To search for a book by Reference Number
searchbytitle()	To search for a book by Title
searchbygenre()	To search for a book by Genre
searchbylanguage()	To search for a book by Language
searchbyauthor()	To search for a book by Author
deletebyrno3()	To delete records based on Reference Number
update()	To update book records based on Reference Number
addreview()	To add a book review
menubooks()	To display main menu of BOOKS table

REVIEW table

addcrev()	For adding a record to REVIEW table
displayrev()	To display records
searchbyrefno1()	To search for a record based on Reference Number
searchbytitle1()	To search for a record based on Title
searchbygenre1()	To search for a record based on Genre
searchbylanguage1()	To search for a record based on Language
searchbyauthor1()	To search for a record based on Author
deletebyrefno()	To delete Records based on Reference Number
updaterev()	To update book review based on Reference Number
menubookreview()	To view main menu of REVIEW table

Modules and functions used:

MODULES

- from tkinter import *
- import mysql.connector
- import webbrowser
- from colorama import Fore, Back, Style
- from PIL import Image
- import fitz
- import PyPDF2

FUNCTIONS

pdf1()	To view the pages of the book-based on page number
pdf2()	To view the pages of the book-based on page number
pdf4()	To view the pages of the book-based on page number
pdf5()	To view the pages of the book-based on page number
pdf6()	To view the pages of the book-based on page number
pdf7()	To view the pages of the book-based on page number
check()	To show welcome image
mainn()	To display main menu of ALL tables
checks()	To show welcome image and welcoming message

SOURCE CODE

```
# importing tkinter module
from tkinter import *
import mysql.connector
import webbrowser
from colorama import Fore, Back, Style
from PIL import Image
import fitz
import PyPDF2
```

Creating tables

def createtable():

```
mydb=mysql.connector.connect(host='localhost',user='root',passwd='adisg',database='RECORDS')
mycursor=mydb.cursor()
myrecords=mycursor.execute('create table staffs(staffId int(6) primary key,Name varchar(20),Age
int(2),Salary int(10),Position varchar(40),City varchar(40),Emailid varchar(25),Phone int(10))')
mycursor.execute('Desc staffs')
for x in mycursor:
    print(x)
createtable()
```

def createtables():

```
mydb=mysql.connector.connect(host='localhost',user='root',passwd='adisg',database="LIBRARY")
mycursor=mydb.cursor()
myrecords=mycursor.execute('create table buy(buyId int(6) primary key,BName varchar(20),Genre
varchar(15),Price int(10),referencenumber int,foreign key(referencenumber) references
review(referencenumber))')
mycursor.execute('Desc buy')
for x in mycursor:
    print(x)
createtable()"
```

```
"""mydb=mysql.connector.connect(host='localhost',user='root',passwd='adisg')
mycursor=mydb.cursor()
mycursor.execute('create database if not exists RECORDS')
mycursor.execute('show databases')
for x in mycursor:
    print(x)
```

def createtable1():

```
mydb=mysql.connector.connect(host='localhost',user='root',passwd='adisg',database='RECORDS')
mycursor=mydb.cursor()
myrecords=mycursor.execute('create table recordcu(CustId int(6) primary key,Name varchar(20),Age
int(2),Genre varchar(15),Emailid varchar(25),Phone int(10))')
mycursor.execute('Desc customer')
```

```
for x in mycursor:
    print(x)
```

BUYING BOOKS

def addres():

```
mydb=mysql.connector.connect(host='localhost',user='root',passwd='adiscg',database="LIBRARY")

+-----+-----+-----+-----+-----+-----+-----+
| referencenumber | title | genre | language | author | ratings | review |
+-----+-----+-----+-----+-----+-----+-----+
| 110 | Harry Potter | Fantasy | English | JK Rowling | 9 | From the first novel, the plot is engaging a  
nd exciting, |
| 111 | Percy Jackson | Fiction | English | Rick Riordan | 8 | I would rate this book five stars, because i  
t has vivid |
| 112 | Life of Pi | Fiction | English | Yann Martel | 8 | It is a triumph of storytelling and a tale t  
hat will, as one character puts it, make you believe in God |
| 113 | Harry potter 2 | fantasy | english | jk rowling | 4 | it was a good book |
| 114 | The Da Vinci Code | Thriller | English | Dan Brown | 8 | The Da Vinci Code by Dan Brown is a fast-pac  
ed thriller |
| 115 | Shadow and the bone | Fantasy | English | Lauren.Sc | 7 | Its a good book with tons of action and adve  
nture |

BOOKS TABLE

```
MySQL 5.5 Command Line Cli x + v
mysql> select * from books12;
+-----+-----+-----+-----+-----+-----+-----+
| referencenumber | title | stock | genre | language | author | summary |
+-----+-----+-----+-----+-----+-----+-----+
| 110 | Harry Potter | 8 | Fantasy | English | JK Rowling | Harry Potter is a wizard living with  
muggles. He goes to the Hogwards school of witchcraft and wizardry. The Harry Potter series take you through the adventures Harry Po  
tter faces at the hands of the evil wizard Voldemort. |
| 111 | Percy Jackson | 10 | Mythological Fiction | English | Rick Riordan | Percy Jackson is a demigod living am  
ong humans. Keep up with his adventures as he gets to know about himself and combats evil. |
| 112 | Life of Pi | 15 | Fiction | English | Yann Martel | It is a triumph of storytelling and  
a tale that will, as one character puts it, make you believe in God. |
| 113 | Harry potter 2 | 2 | fantasy | English | JK Rowling | As the very name suggests the book i  
s about a parisian opera that is apparently haunted by an alluring and mysterious phantom. |
| 114 | The Da Vinci Code | 20 | Crime | English | Dan Brown | The crime thriller novel in which Ro  
bert Landon races against time to get to the bottom of a murder mystery. |

Reference Number    Title          Stock    Genre    Language    Author
110                Harry Potter   8        Fantasy  English     JK Rowling
Summary:
Harry Potter is a wizard living with muggles. He goes to the Hogwards school of witchcraft and wizardry. The Harry Potter series take you through the adventures Harry Potter faces at the hands of the evil wizard Voldemort.
111                Percy Jackson 10 Mythological Fiction  English    Rick Riordan
Summary:
Percy Jackson is a demigod living among humans. Keep up with his adventures as he gets to know about himself and combats evil.
112                Life of Pi    15        Fiction  English     Yann Martel
Summary:
It is a triumph of storytelling and a tale that will, as one character puts it, make you believe in God.
113 Phantom of the Opera 17        Thriller  French    Gastom Leroux
Summary:
As the very name suggests the book is about a parisian opera that is apparently haunted by an alluring and mysterious phantom.
114                The Da Vinci Code 20        Crime     English    Dan Brown
Summary:
The crime thriller novel in which Robert Landon races against time to get to the bottom of a murder mystery.
115 Shadow and the bone 2        fantasy   English    Leigh
Summary:
it is a fantasy book based upon a fantasy world with a hint of adventure

Harry moved back into the shadows next to Hedwig, who seemed to have realised how important this was and kept still and silent. The car revved louder and louder and suddenly, with a crunching noise, the bars were pulled clean out of the window as Fred drove straight up in the air – Harry ran back to the window to see the bars dangling a few feet above the ground. Panting, Ron hoisted them up into the car. Harry listened anxiously, but there was no sound from the Dursleys' bedroom.

When the bars were safely in the back seat with Ron, Fred reversed as close as possible to Harry's window.

'Get in,' Ron said.

'But all my Hogwarts stuff ... my wand ... my broomstick ...'

'Where is it?'

'Locked in the cupboard under the stairs, and I can't get out of this room –'

'No problem,' said George from the front passenger seat. 'Out of the way, Harry.'

Fred and George climbed carefully through the window into Harry's room. You had to hand it to them, thought Harry, as George took an ordinary hairpin from his pocket and started to pick the lock.

'A lot of wizards think it's a waste of time, knowing this sort of Muggle trick,' said Fred, 'but we feel they're skills worth learning, even if they are a bit slow.'

There was a small click and the door swung open.

'So – we'll get your trunk – you grab anything you need from your room and hand it out to Ron,' whispered George.

'Watch out for the bottom stair, it creaks,' Harry whispered back, as the twins disappeared onto the dark landing.

Harry dashed around his room, collecting his things together and passing them out of the window to Ron. Then he went to help Fred and George heave his trunk up the stairs. Harry heard Uncle Vernon cough.

At last, panting, they reached the landing, then carried the trunk through Harry's room to the open window. Fred climbed back into the car to pull with Ron, and Harry and George pushed from the bedroom side. Inch by inch, the trunk slid through the window.

Uncle Vernon coughed again.

'A bit more,' panted Fred, who was pulling from inside the car, 'one good push ...'

Harry and George threw their shoulders against the trunk and it slid out of

"Sorry to bother you, Ma'am, but I'm a private investigator and I was wondering if I could ask you a few questions about Mr. Jim Colter's death?" Cy said, trying to be polite while also getting straight to the point.

"The police have all the information. They told us the scene was closed and the mess was taken care of," she said, folding her arms across her chest and planting her feet more firmly in the doorway.

Cy stood taller than most people, but like Bonnie, this older woman stood only about four inches below his six-foot-three. He could tell she was tougher than the relaxed clothing made her appear. "I've got the case file from the police department," he said, showing her the folder and flipping it open to authenticate his proof. "I was just hoping to get more insight by coming here. Do you mind if I ask you and your husband some questions?"

"I don't know what you'll get from it, but I guess," the woman said reluctantly with a sigh while uncrossing her arms. "Come in and have a seat."

The older woman led him through the door, leaving it open. A few feet beyond the door, she pointed to a wooden table in the small kitchen. Cy stepped into the houseboat and moved to pull the door closed, but the woman said, "You can leave that open, that way when I scream for help, my neighbors will hear me."

Cy shook his head, leaving the door as it was. He sat down in the chair she'd pointed to. "I'm here strictly as a professional, Mrs. ..."

"Lund," the woman offered.

"Is Mr. Lund around?" Cy asked.

The older woman looked around the small houseboat kitchen and living room and said sarcastically, "I don't see him."

"Okay," Cy said, again opening the file and glancing down at the papers. He already knew everything that the documents and photos described, but he wanted her to see that he had a reference for his questions.

"Mr. Colter was here doing electrical work for you," he looked up from the folder.

Mrs. Lund nodded.

"What was he working on?"

"The wiring to our heating element had a bad connection. It gets chilly out over the water in the evenings."

"And how long would you say you and Mr. Lund were gone from the house?"

“If he wanted to,” Zeus said, “he could drink faster than all of you! I bet he would set a new world record tonight. Wouldn’t you love to see that?”

Atlas, Hyperion, Koios, and the others cheered and called for a contest.

Kronos *really* wasn’t in the mood, but he couldn’t decline. His honor as a super-chugger was at stake. He gestured for Zeus to bring in another round.

Zeus ran to the kitchen and fetched his special concoctions. He offered the guests their sleepy-time nectar, then served Kronos last, giving the king no time to smell his brew before yelling, “Ready, set, go!”

The Titans gulped down their tasty beverages. Kronos immediately noticed that his nectar tasted weird, but it was a contest. He couldn’t stop chugging. The whole point was to drain the cup! Maybe his taste buds were just a little off. After all, Zeus had never steered him wrong.

Kronos drained his nectar in two and a half seconds. He slammed the goblet upside down on the table and shouted: “I win! I—”

The next sound out of his mouth was like a walrus getting the Heimlich maneuver.

There’s no pleasant way to say it. Kronos puked. He puked a puke worthy of the king of the universe. It was a *kingly* puke.

His stomach tried to propel itself out his throat. His mouth hinged open all by itself—the better to upchuck you with, my dear—and shot out five gods, a very slimy rock, quite a lot of nectar, some biscuits, and a chariot license plate. (No, I don’t know how all that got in there.)

The five disgorged gods immediately grew to full-size adults right there on the dining table. The Titan guests stared in amazement, their minds working slowly due to the spiked nectar.

As for Kronos, he was still trying to catapult his guts across the throne room.

“Get—” He retched. “—them!”

her suffering. That would be *one* way to the Underworld—probably the only way she could manage. But she had her unborn baby to think about. And she hadn't come this far only to give up. Plus, her last half dozen suicide attempts hadn't worked out so well.

"Don't do it," said a voice, rumbling from the stones at her feet. "Jumping off towers is never the answer."

Psyche stepped back from the edge. "Hello? Is—is that the tower speaking?"

"Yes," said the tower, resonating like a giant stone tuning fork. "I am the tower."

Something about the voice sounded familiar, though....

Psyche's heart leaped with joy. "Eros? Is that you?"

A moment's pause.

"No," said the voice, now in falsetto. "I don't know any Eros. Just listen...." The tower cleared its throat (or whatever towers have instead of throats. Stairwells?).

In a deeper tone, it continued. "Head toward the city of Sparta and find Mount Taenarus. At the base of the mountain, you'll see a volcanic fissure that's a breathing vent for the Underworld. It won't be easy, but you can climb down that way to Hades's domain."

"Oh...okay."

"Before you climb down, be sure you pick up two honey-flavored rice cakes and two drachma coins. You can get the rice cakes in Sparta, or I think there's a convenience store off the highway around Exit Forty-three."

"Um, all right. What do I do with that stuff?"

"You'll know when the time comes. But listen, don't let anything stop you until you reach Persephone. My mom will put up all sorts of distractions."

"Your mom?"

Another hesitation. The voice went falsetto again. "Obviously, towers don't have moms. I meant your mother-in-law, Aphrodite."

Psyche was sure now that her estranged husband was trying to help her. She loved him for that. Even his falsetto voice was kind of cute. But she decided to play along. "I'm listening, O Great Tower, who in no way resembles my wonderful husband."

"Okay, then," said the voice. "As I was saying, Aphrodite will create distractions to test your resolve. She knows you are kind and helpful. She will try to use that against you. No matter who asks you for help on your journey, don't listen to them! Don't stop!"

"Thank you, Tower. If you were my husband, Eros, which of course you aren't, I would tell you I love you deeply and I'm very sorry. Also, how's the shoulder?"

"It hurts pretty bad," said the tower. "But I think..." Falsetto: "Towers

of the soul as the body's inhabitant. Albeit implicitly, Luke's evangelium already claims that the growth of the Roman Empire had been brought about by divine providence as a condition for the spreading of the Christian faith, and that Imperial Rome and Christianity were thus closely related. A lengthy presentation of this idea can be found in a text written in the second century AD by the Bishop Melito of Sardis, who also wrote a lost apology dedicated to the Emperor Marcus Aurelius; and likewise in the apology by Athenagoras, which I shall discuss below. Melito was, moreover, the author of an Easter sermon which has been preserved on papyrus. This is an early specimen of a genre of Christian prose literature which was to develop fully in the subsequent centuries (see p. 517). In Melito's text, the rhythmical patterns do not follow the traditional rules of Greek literary prose, but rather reflect the influence which Semitic, and above all Syro-Aramaic verse forms had on the emerging Christian literature.

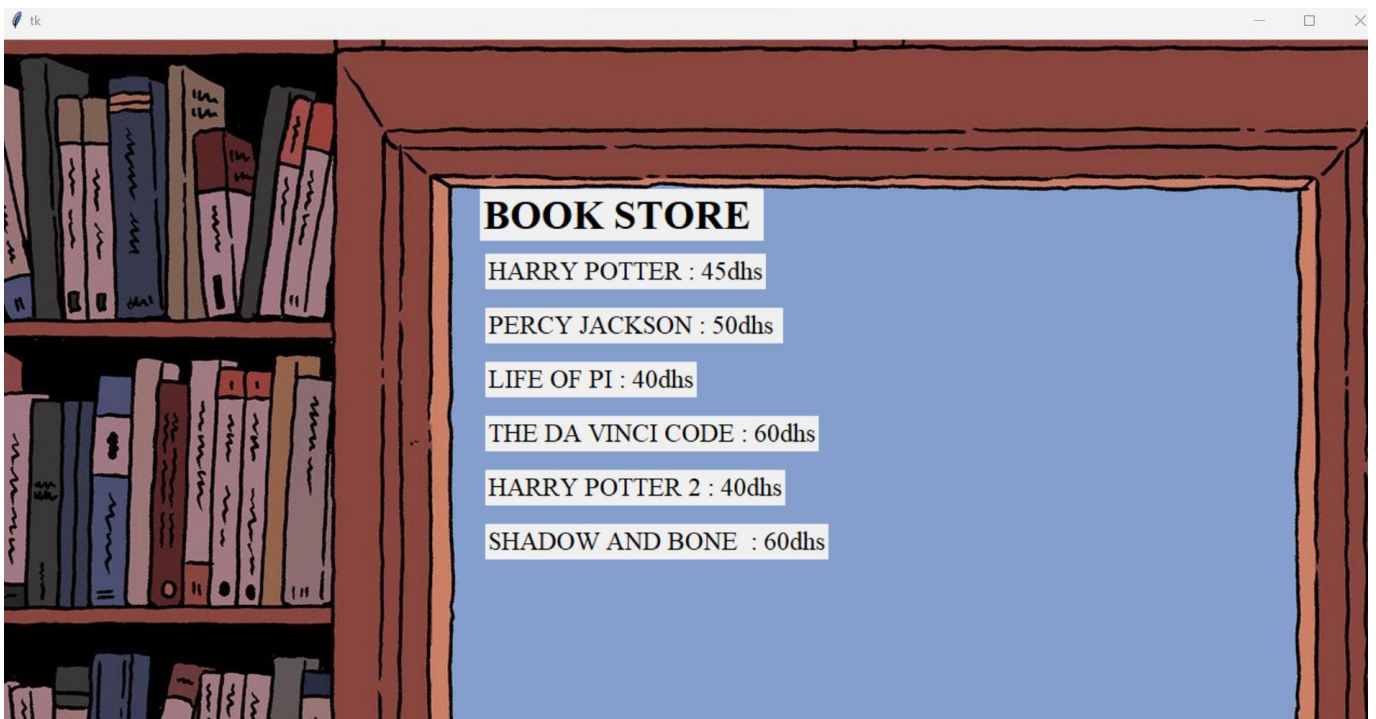

The apology by the Athenian Athenagoras does not go beyond a defence of the Christians against accusations of godlessness, and of ritual crimes. A contemporary work dedicated to Athenagoras was Bogthus' treatise on the intricacies of Plato's use of language. This underlines the fact that like Justin, Athenagoras was one of those Christians who had a full share in the intellectual life of their pagan environment, and who bore the title of philosopher. Beside the apology, he also wrote a treatise about the bodily resurrection of the dead, a notion which must have struck educated people as particularly repulsive. The argument for it is presented in a very subtle way, starting with the commonly accepted Platonic doctrine about the immortality of the soul. Athenagoras holds that this immortal soul still needs a body which is able to suffer, so that the soul can fulfil its destiny beyond the threshold of physical death, and be punished or rewarded for good or evil deeds.

A treatise which may likewise be classed as an apology is *To Autolycus* by the Bishop Theophilus of Antioch, although this tract contains more polemics against Classical mythology and philosophy than statements in defence or in explanation of the Christian faith. The transition from defence to attack, however, has always been one of the options open to the apologetical writer. Pure polemic is found in the *Speech Against the Hellenes* by the Syrian Tatianus, one of Justin's pupils. The majority of the apologists tried their best to prove that Graeco-Roman culture and Biblical-Christian tradition were in many ways related to one another; Tatian

a thank you window pops up and the program ends

RESULT :

Program executed successfully

CONCLUSION

Our project is designed to meet the requirements of the users to keep a record and buy books.

All the difficulties that we had during the execution of the project was successfully corrected and executed with the help of our respective teacher. We have spent a lot of our time and effort in completing this project to give our best results.

Therefore, we look forward to making more programs to be able to have more knowledge of the same.
